

Saudi Arabia: UNICOIL becomes the First Saudi Company to be Accredited with Kuwaiti Quality Marks

Middle East Steel News

UNICOIL becomes the first Saudi company to be accredited with Kuwaiti Quality Marks Saudi Arabia

[Universal Metal Coating Company Ltd \(UNICOIL\)](#), headquartered in Jubail Industrial City, received the Kuwaiti Quality Mark in yet another first achievement added to its impressive list of accreditations, including SASO's Saudi quality mark, ESMA's Emirates Quality Mark, JSMO's Jordan Quality Mark and the ISO Quality Certificate, for [UNICOIL's](#) Galvanized Steel products.

[UNICOIL](#) is the only Saudi and Arab company to receive several quality marks outside its home country. A company spokesperson explained that the international quality certificates, and the local and Arab quality marks awarded to [UNICOIL](#) clearly recognize the quality fundamentals upheld by the company since its inception in 1997. [UNICOIL's](#) products are the most compliant with international standards, and the best known for outstanding quality in Saudi and regional markets.

[UNICOIL](#), in addition to its standing as the largest Galvanized Steel manufacturer in the GCC, is also MENA's oldest and largest manufacturer of Pre-painted Galvanized Steel, boasting the highest production capacity region-wide. It caters to the bulk of Kingdom's demand, and exports to regional and international markets. [UNICOIL](#) is also the largest value-added steel manufacturer in Saudi Arabia, using a "push-pull pickling line" with a production capacity of 400,000 tons per annum, a "cold rolling mill" with a production capacity of 340,000 tons per annum, a "continuous Galvanizing line" with a production capacity of 250,000 tons per annum, and two "Color Coating lines" with a production capacity of 210,000 tons per annum, the first located in Jubail Industrial City and the second in Jeddah.

It is noted that [UNICOIL's](#) Galvanized and Pre-painted Steel products are used in many applications, including air conditioning and air ducts, portable water tanks and pipes, meat and vegetable cold stores, magnetic whiteboard, school playgrounds, sports arenas and swimming pools, prefabricated worker housing, and other applications which bring the products to direct contact with humans. "The company keenly endeavors to fulfill its corporate social responsibility and ensure transparency by providing environmentally friendly and safe products with lead-free zinc used in galvanizing and pre-painting", [UNICOIL's](#) spokesperson added.
